

EXTERIOR COLOR SCHEME

Color Scheme Implementation and Approval

A home's exterior is a reflection of its owner's personal sense of style. When it comes to HOA communities, however, that very same exterior also impacts the community as a whole. The color palette for Founders Ridge was developed by Taylor Morrison to create an atmosphere of neighborliness and harmony. The homeowner's association is charged with keeping the community up to this standard.

The Color Palette

The color palette contained in the attached Appendix 1 and Appendix 2 has been approved for use in Founders Ridge Board of Directors. Homes may be painted one shade darker or 2 shades lighter than a color in the palette; for example, Sherwin Williams 6221, may be 6222 darker or 6220 or 6219 lighter. In order to ensure the esthetics and quality of the community Sherwin-Williams or Benjamin Moore paint is recommended for all exterior painted surfaces.

Changing Exterior Color and Color Not on Approved Palette

Owners must obtain Architectural Control Committee (ACC), approval of the selected palette color for their home's exterior prior to changing the paint color. For any color not included in the approved color palette, Owners must obtain an approved variance from the Architectural Control Committee. In either circumstance the Architectural Control Committee will consider the chosen color's compatibility with the colors of adjoining properties and may require Owners to choose another color.

The Color Palette specifies compatible color selections with paint specification number and name for the Body, Trim, Garage Doors, Exterior Doors and Accent.

Body (siding areas): dormer windows, rakes above rooflines, stucco and brick (walls).

Trim: cornice, fascia, window trim, garage frame, gutters. Gutters painted accent color (non-standard color or darker pallet) require ACC approval.

Accent: exterior doors, shutters, and metal roofs or tops of bay windows.

Garage Doors: to be painted trim or body color.

Exterior Doors: to be painted trim or body color.

Front Doors: to be painted trim or body color or a compatible color with a brick entrance (Dark Brown, Black). Any other color must have ACC approval.

Roof Mounted: plumbing stacks, vents, and chimney shrouds should be painted SW 6258 Tricorn Black or equivalent.

Brick and Stone: shall be left natural. An approved clear sealer may be applied. (BEHR Premium Low Luster Sealer)

Common Area Fence Stain: There are two general types of wood stain acceptable. Water based and oil based. Cabot is the accepted oil-based stain manufacturer. Chestnut brown is the approved color. Bear is the accepted water-based stain manufacturer.

Stain Finishes for new or reconditioned wood: Cabot (Chestnut), Bear Semi-Transparent or Solid (Red Cedar SC-152).

Stain Finishes for weathered wood: Cabot solid (Chestnut), Bear solid (Red Cedar SC-152).
